AI PARTNERS · THE AI ASSESSMENT

Your business is leaking money through work software should d We find it, rank it, and prove the fix on your own data.

A five-day diagnostic, built from your team's real hours and tools. Not a consultant's opinion. A ranked money map with a working demo behind it.

DURATION
5 working days
from go to ranked findings

SOURCE OF NUMBERS
Your people
their actual hours, tools, bottlenecks

PROOF
A working demo
built on your redacted files, not slideware

THE STACK WE BUILD WITH

Claude · Google · Anthropic · n8n · Supabase · Vercel · GitHub · Stripe · Figma

THE PROBLEM

The tool pile grew. The work stayed manual.

Most service businesses now run on a stack that costs four figures a month, none of it owned, none of it talking to the others. Everyone bought tools. Nobody redid the work.

01

Work repeats by hand

Quoting, dispatching, invoicing, following up, reporting. The same moves, every day, by people whose hours cost real money.

02

Data lives everywhere

Inboxes, spreadsheets, three dashboards, a CRM nobody fills in. Nobody can see the whole machine, so nobody can fix it.

03

Nobody knows where AI fits

The tools all promise AI now. Which one p
business, this quarter? That is exactly the
question.

THE PILE MOST BUSINESSES ARRIVE WITH

Zapier | Mailchimp | CRM | SCHEDULER | FORMS | HELPDESK | PIPELINE | REPORTS | + NEXT YEAR'S

Every tile is rent. The vendor keeps the asset, the data, and the upside. You keep the invoice.

HOW IT WORKS

Seven steps. Five days. Your people, not our guesses.

1 **The owner call. Not a pitch.**
Twenty minutes. Where does work slow down, who does what, what hurts. We listen, record, and map.

2 **The team survey that books itself.**
Three minutes per person: where their work stalls, which software they to named tasks. It ends by booking their own interview slot.

3 **30-minute interviews.**
"You said dispatching stalls, tell me more." An AI notetaker captures every word so nothing relies on memory.

4 **Your files, redacted.**
A booking, an invoice, a run sheet, names blurred. We treat everything as delete on request.

5 **A working demo on your data.**
Not a mockup: the single worst workflow, actually done by software, on your own examples. This is the moment it clicks.

6 **The ranked money map.**
Every opportunity scored by hours saved and cost, from your team's num build later, leave alone.

7 **You decide with numbers.**
What it returns, in writing, before you pay for any build. If the answer is "not worth it", we say that too.

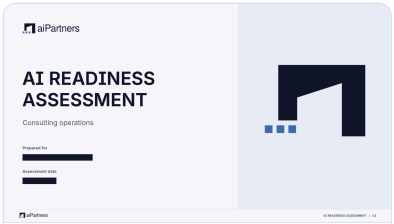

✓ **The whole engine, documented.**
Surveys, interviews, demo, ranking. You keep everything, including the ra

5 working days | Zero prep needed from you | Read-only access, NDA on request | Nothing trains on your data

WHAT COMES BACK

Documents you can act on. Demo you can touch.

Four of the deliverable set below ship in every assessment, titled for your business. These are real covers from delivered work.

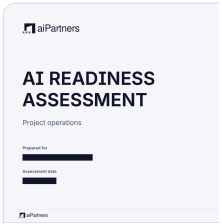

Billing & follow-up: what to automate first

Quote follow-up: the reply engine

Reporting & onboarding: numbers without the grunt

Scope & approvals: what t alone

RANKED LIST

Every AI opportunity in your business, scored by return, built from your team's hours and rates.

WORKING DEMO

Your worst workflow, done by software, on your redacted files. Live in front of you.

THE MONEY MAP

Hours back, cash back, payback period. In writing, before you commit to any build.

THE DECISION SHEET

Build now, build later, lea page, no fluff, defensible

PROOF

What this engine has already produced.

LIVE CASE · US GROUND-TRANSPORT FLEET

Quoting engine, built on their rules

Full assessment delivered: audit, findings, six-tab money map. Then the owner's real rate card (every vehicle, every zone, every surcharge) was wired into a quoting engine spec: **the machine quotes from his rules or hands it to a human. Never guesses.**

Client names withheld by policy.

THE METHOD'S DOCUMENTED CASE

1 hour → ~5 minutes

Inspection report to price proposal: an hour of skilled work, done by the demo in minutes, priced within 6% of the human freelancer. That close came from the same engine this assessment runs. (Methodology source: Certified AI Partners, Provo UT, documented client case.)

THE LADDER

Every price in plain sight.

#	RUNG	WHAT YOU GET
01	**The Check**	The five-day diagnostic. Everything in this deck. **Credited in full against any build within 30 days.**
02	**Deep Diagnostic**	For bigger machines: ten days, every process and team mapped.
03	**The Sprint**	Two weeks. First build live in your stack. €1,650 after the Check.
04	**Partner**	Your software department. Monthly builds, portal, return in writing. 60-day minimum.
05	**Department**	A whole function, staffed and shipped.
06	**Custom**	Platforms and migrations. Scope agreed in writing, 50% deposit.

Check credited in 30 days | Trades, not discounts | Split payments | Leave any month

START

Bring your worst process.
Leave with a plan.

Fifteen minutes. You talk, we listen, we tell you whether a Check is even worth your money. Sometimes the answer is no, and you keep the advice.

BOOK IT

cal.com/bjovibes/15minaipartners

Say **"Check"** and the five days start that week.
